

the Clinical Chemist

The American Board of Clinical Chemistry, Inc., held its annual meeting at the Haddon Hall Hotel in Atlantic City on April 15, 1956. Five clinical chemists, who successfully passed the examination given by the Board last October were certified: W. Knowlton Hall, W. Burkett Mason, Harold Persky, Edwin M. Richardson, and Guilford G. Rudolph. This brings the total number of certified clinical chemists to 246.

A complete *Directory of Certified Clinical Chemists* is available without charge to hospital departments or other laboratories engaging in clinical chemistry. This may be obtained from Dr. William A. Wolff, Bowman Gray School of Medicine, Winston-Salem 7, N. C.

Clinical chemists interested in being certified should also write for the Instructions to Applicants for Certification. In order to be considered for

admission to the next regional examinations, which will probably be held during October, 1956, candidates should file their applications immediately.

The Board elected the following officers for the fiscal year July 1, 1956, to June 30, 1957: *President*, Marschelle H. Power, Mayo Clinic, Rochester, Minn.; *Vice-President*, Warren M. Sperry, New York State Psychiatric Institute, New York, N. Y.; and *Secretary-Treasurer*, William A. Wolff, Bowman Gray School of Medicine, Winston-Salem, N. C. During the above fiscal year, the other members of the Board will be: Albert L. Chaney, Joseph W. E. Harrison, Robert M. Hill, Clarence W. Muehlberger, Arnold E. Osterberg, Joseph I. Routh, and Harry Sobotka. Members elect, whose active membership will begin at the end of the above period, are: R. M. Archibald and Joseph H. Gast.
